HYDRAULIC RECEDING HEAD CUTTING PRESS

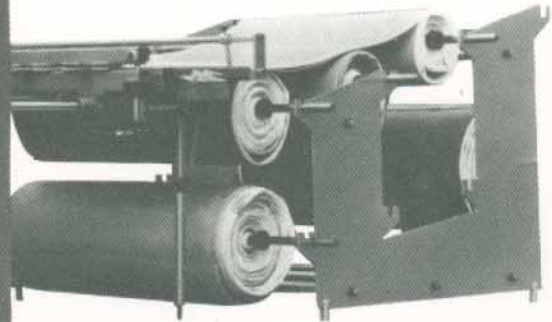

CHEN FENG HYDRAULIC MACHINERY CO.,LTD.

CF-556

HYDRAULIC RECEDING HEAD CUTTING PRESS

Optional:
Machine with automatic feeder and
roll-holder (4 or 8 rolls)

This machine is suitable for cutting one or several layers of sheet materials such as leather, plastic, rubber, textiles, cardboards, synthetic materials, etc. Easy to operate and noiseless.

Main features:

1. This machine is easy to operate by photo cell device ensuring total protection of the Worker.
2. A beam, moving horizontally and rapidly, advances and retracts, controlled by a hydraulic jack.
3. The cutting stroke easy to adjustable.
4. The machine can be equipped with a hydraulic automatic feeder and roll-holder (optional) in which the use of roll materials is desirable.

SPECIFICATION:

MODEL	CF-556-50T	
TECHNICAL DATA		
Dimension (W×H×D)	83×61.4×84.6 in.	2110×1560×2150mm
Cutting Area (W×D)	63.8×36 in.	1620×915 mm
maximum Pressure	110,000 lbs.	50,000 kgs.
Stroke	0-4.3 in.	0-110 mm
Horse Power	10 HP	
Net Weight	9,240 lbs.	4,200 kgs.
Gross Weight	10,120 lbs.	4,600 kgs.
